</tr>
</thead>
</table>
| September 7| Sabine Costagliola                              | Meritxell Huch  
Wellcome Trust/Cancer Research UK  
Gurdon Institute  
Cambridge                                                      |
|            |                                                | ‘Adult stem/progenitor cells and organoid cultures. Applications for the study of human biology and disease’ |
| September 14| Jaime Pita                                     | Rodrigue Rossignol  
INSERM U1211 rare Diseases  
Genetics and Metabolism  
University of Bordeaux                                           |
|            |                                                | “Bioenergetics of lung tumors: therapeutic opportunities?”                                         |
| September 21| Sabine Costagliola                             | Evi Soutoglou  
Institut de Génétique de Biologie Moléculaire et Cellulaire (IGBMC), Department of  
Development and Stem Cells, France                                |
|            |                                                | ‘Nuclear architecture in maintenance of genome integrity’                                        |
| September 28 | François Fuks                                  | Danette L. Daniels  
Functional Proteomics at Promega  
Cell Biology, Cancer Research, Molecular Biology  
Madison, USA                                                       |
|            |                                                | ‘Understanding functional interactions of epigenetic drug compounds’                              |
